Figure 1 shows various map symbols and their corresponding text labels. The symbols are arranged in a grid-like fashion. The first column contains symbols for 'Highway', 'Secondary Road', 'Trail/Walkway/Ferry', and 'Railroad'. The second column contains symbols for 'Pipe/Power Line', 'Ridge/Physical Feature', 'Property/Fence Line', and 'Nonvisible Boundary'. The third column contains symbols for 'Stream/Shoreline', 'Intermittent Stream', 'River / Lake', and 'Glacier'. Below these symbols are three text labels: 'Modality' (in a blue box), 'Inset' (in a grey box), and 'Out Area' (in a grey box).

Where international, state, and/or county boundaries coincide, the map shows

¹ A '*' following a place name indicates that the place is coextensive with a MCD. A '^' indicates that the place is also a false MCD; the false MCD name is not shown.

2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land area for the purpose of the census, based on an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

³ A '*' following a block number indicates that the block number is repeated elsewhere in the block.
